J. Water and Wastewater Meter Reading Adjustments

The Trustees continued discussions regarding billing discrepancies affecting commercial properties and multi-unit apartment buildings. Letters were previously sent to all impacted property owners explaining the discrepancies and outlining the corrected billing to be reflected in the next billing statement.

During the door-to-door review, it was determined that approximately 40–50% of water meters had been estimated each month due to malfunctioning equipment rather than being physically read. Work orders have been issued to replace the defective meters or sensor pads to ensure accurate billing moving forward.

The review also identified several commercial and multi-unit properties that had been assigned incorrect rate classifications within the billing system. After reviewing the findings, the Trustees voted to apply the corrected rate classifications retroactive to January 1, 2026.

The Trustees also discussed the need for future conversations regarding simplifying the Village's commercial, residential, and multi-unit rate structures.

Marilyn Prue made a motion to approve the commercial and apartment account corrections as presented. Gina Lyon seconded the motion.

Motion carried.
